About us

The company capital is 10 million EGP, and company is currently running different projects exceeding volume of 120 million U.S Dollars.

Evergreen Egypt United is a member of Arab-Chinese Association which is affiliated with Arab League Organization, it is connecting Arabian countries with china, working as a bridge connecting the two nations not only for Business & Trade but for Culture Exchange as well.

Evergreen Egypt United has semi-intensive farming technology and intensive culture technology. It is one of the companies of the Guangdong Evergreen Group and ranked 28 in the field of fish feed as a global fish farming company.

Mission

Ever green Egypt took responsibility for solving the problem of the gap between production consumption in the Egyptian fishery, where the company has many potentials and technical expertise to support fish production in Egypt, these possibilities include possessing the Egyptian-Chinese expertise for unloading Nile and oval fish, scientific potentials and expertise for the production of larvae of marine or Nile prawns of various types.

These possibilities have emerged in the design and construction of fish and shrimp hatcheries, the largest of its kind in the Middle East and North Africa region, China's unique in the production of all kinds of marine fish feed and indigo and shrimp, and the possibilities of a large company emerged in this field in the establishment of the fish feed factory and shrimp pond project pipe for aquaculture.

“Ghalioun” Mega Project:

One the most important and largest projects carried out by Evergreen fish farming project Barkat Ghalioun Kafr El-Sheikh Governorate with business volume of 76 million U.S Dollar.

Ghalioun Project is one of the largest fish projects in Egypt and the Middle East and Africa, but one of the largest fish farming projects all over the world.

Evergreen Egypt United, in cooperation with the Armed Forces, contributed to the success of this giant project and its appearance to serve the great Egyptian people.

“Ghalioun” Mega Project:

The most important feature of this project is that it is an integrated project, similar to a lot in the integrated fish city where this project contains:

1. Fish and shrimp Tatcheries
2. Fish and Shrimp Feeding Plant:
3. Fish and Shrimp Products Factory
4. Research & Development Laboratory
5. Ice Factory
6. Foam Box Factory
7. Sea Cages

Fish & Shrimp Hatcheries:

Evergreen Egypt United has sufficient experience and potential to establish fish and shrimp hatcheries with a production capacity of up to 20 million fish fry and 2 billion shrimp larvae.

The temperature of the ponds is controlled automatically by the control devices. Sufficient for the team to work on all stages of hatchery.

Fish & Shrimp Feeding Plant:

Evergreen Egypt United Company has the necessary capacities to construct the plant with a production capacity of 240000 tons of high quality fish fodder annually, as well as 120000 tons of high quality shrimp feed annually.

With the establishment of two warehouses for the final product & raw materials as well as the silos of the factory As well as providing adequate training for the factory team to train on all machines used in the factory production lines.

Fish & Shrimp Products Factory:

Evergreen has the capacity and capabilities to set up the plant with various capacities of up to 100 tons/day (fresh fish, frozen fish, fillet, fried fish and shrimps with its various types of shrimps, shrimps, shrimps, Cooked shrimp),

as well as adequate training of the factory staff to train on all machines used in factory production lines under the supervision of a Chinese expert group at the highest level.

Research & Development Laboratory:

Evergreen Egypt United Company works to achieve the highest quality of its products & maintain its leadership in the domestic & international market, so it establishes research and development laboratories and provides them with the latest technologies and devices to assist in the analysis of samples and the detection of diseases and viruses and treatment and to contribute to the development of the fish farm.

As well as providing adequate training to the team of the laboratory for training on all devices used.

Ice Factory

Evergreen Egypt United has the necessary facilities to set up a factory of ice blocks and crushed ice with various capacities ranging from 10 ton / day to 60 ton / day 40 tons of crushed Ice 20 tons of ice blocks daily with a total of 60 tons /day. Sufficient for the factory working team to train on all machines used in production lines in the factory.

Foam Box Factory:

Evergreen Egypt United Company, which has the ability to establish a factory of foam boxes, which contributes to the ease of currency transfer of fish and packaged various production ranging from 900 to 1500 kg / 8 hours. Produce training for all staff for all machines used in factory production lines.

Sea Cages:

Egypt United Company has ability to establish sea cages and fish farming at different depths ranging from 8 meters up to 20 meters and also has the ability to set up these cages in different sizes starting from 20 meters for the diameter of the cage and up to 60 meter.

It also has sufficient experience to provide the necessary studies on how to culture these cages and to train and provide theoretical and practical training for the work of these cages to achieve the highest accuracy and skill in work.

Other Mega Projects of —Evergreen Egypt United.

Marine Aquaculture — Sea Cages Project East of Port Said:

Evergreen currently is working on another mega project to set up another project of Marine Aquaculture Sea Cages in Mediterranean Sea at the East of Port Said with volume of 100 cages as a first phase of the project.

Export of Fish & Agro—Products:

Evergreen is the authorized company in a partnership with Egyptian Armed Forces to export fish products from Ghalioun & Eas-Port Said projects in addition to export of agro products from the mega project “Egypt Greenhouses” owned by the National Greenhouses Company owned by Egyptian Armed Forces.

We have mega projects with Egyptian Armed Forces and we are proud of them as national projects for Egypt, but we are not limited or exclusive to work only with Egyptian Armed Forces, we work in Egypt & globally totally independent.

Currently, we export to China, South-Korea & Hong kong and working on extending exports to another global markets (mostly EU markets) very soon. In addition we have some projects coming soon with Suez Canal Authority.

Future Proposed Projects with Latvia:

Evergreen Egypt United is very interested to extend its business to work globally and looking forward to work in Latvia to start new joint-venture projects, investment and trade (import & export) in the fields of fish industry with all sub-industries in this sector, in addition to agro & food industries and all sub-industries under that sector as well.

We are open even to get into new business projects in other new sectors.

Next step for business collaboration with Latvia and Latvian Partners should be determined according to the results of our coming business mission to Latvia and we are open for all willing to go on with the concept of win-win collaboration.

We are also willing to establish a business association or a council which works as a bridge between Egypt & Arab world from one side and Latvia from the other side to connect the two sides in business and culture.

We have a successful experience and large network in Egypt & Arab World in that kind of collaboration we've done with China, and we are looking forward to establish another successful platform of collaboration in business and culture with Latvia as well.
